Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:

2. ☐ Claims Nos.:
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

The special technical feature of the invention of claims 1-3 is "the adhesive layer comprising a polyvinylpyrrolidone resin three-dimensionally crosslinked", while the special technical feature of the invention of claims 4-7 is "the adhesive layer comprising a mixture of a polyvinylpyrrolidone resin and at least one member selected from among silanol-group-having resins, silanol-group-having oligomers and silane coupling agents". Between the invention of claims 1-3 and the invention of claims 4-7, it does not appear that there is a technical relationship involving one or more of the same or corresponding "special technical features". (continued to extra sheet)

2. ☒ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:

4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
